SHEIK ABDULLAH

Full Stack Web Developer

sheikabdullah.web@gmail.com • https://www.linkedin.com/in/sheik-abdullah-678401273/ • Pudukkottai

Summary

I am a Computer Science and Engineering student with a strong passion for backend web development. Specializing in Python and Django, I have successfully completed two freelance projects—a Real Estate Management System and an Employee Tracking System. My expertise includes building scalable REST APIs, optimizing database performance, and deploying web applications using cloud platforms. I am eager to take on challenging projects and continuously enhance my skills in backend development and software engineering.

Experience

VDart
Trichy

Full Stack Developer Intern
2025

- Contributed to building full-stack web applications using JavaScript, depending on the project requirements.
- Implemented REST APIs for data management and integrated them with frontend components.
- Collaborated with senior developers to debug, optimize, and deploy applications.
- Gained hands-on experience in Git/GitHub version control and Agile workflows.
- Enhanced skills in HTML, CSS, JavaScript, React, and backend frameworks.

Education

Mookambigai College of engineering
2022 - 2026

B.E Computer Science and Engineering

Skills

Frontend: HTML · CSS · Tailwind CSS · React · TypeScript

Backend: Node.js · Express.js · REST API · FastAPI

Database: MySQL · PostgreSQL

Programming Language: JavaScript · Python

Projects

Full stack real estate project
Georgia

10/2024 - 01/2025

Worked as a freelance Backend Developer on a Real Estate Management System, building RESTful APIs, implementing authentication, optimizing database queries, and deploying the project in render

- A streamlined real estate platform designed for agents to easily add, manage, and showcase properties. It simplifies property listings, saves time, and enhances efficiency with user-friendly tools for tracking inquiries, scheduling visits, and managing client interactions—all in one place.

Key Achievements

Freelance Projects

Real Estate Project: Developed complex backend logic for property listings, adding properties, booking functionality and user authentication using REST api.

Freelance Projects

Employee Tracking System: Built a backend system for tracking employee work status, generating automated reports, and enabling secure data access with JWT authentication.
